## **On-site pill-testing interventions in the European Union**

Author(s) Kriener H, Billeth R, Gollner C et al. Published Monday, January 1, 2001 - 12:00 Publisher EMCDDA

## **Abstract**

In order to respond to specific information needs emerging from the challenge of synthetic drugs, a specialised form of outreach work was analysed in a recent report on on-site pill testing interventions in the European Union - i.e. interventions which approach hard-to-reach groups in clubs and raves through the offer to analyse on the spot their pills (sold as 'ecstasy').
